WHAT IS THE LASERPLATE?

At KY Laser Products, we manufacture one-of-a-kind vanity license plates called THE LASERPLATE. Our #304 Stainless Steel has been polished to a mirror finish, then we cut a custom plates design into the metal with our high powered laser. This design can include text, images, or both. After your custom plate is cut, then you have to decide what to put behind it. We currently offer 3 packages:

THE ORIGINAL LASERPLATE - Your custom designed LASERPLATE with a poly background(matte finish) and snap caps for bolt-up. This is a great low-cost option for a one of a kind custom plate.

THE PREMIUM LASERPLATE - Your custom designed LASERPLATE with an Acrylic background(glossy finish) and choice of bullet bolts or snap caps. The acrylic background color is a beautiful upgrade to a beautiful custom plate.

THE LED LITEUP LASERPLATE - Your custom designed LASERPLATE, a special transparent acrylic color background is applied and then sealed to an extremely bright LED array. This package is completely waterproof and wired with super-strong soldered and sealed connections. Most people wire them to their lights or a toggle switch so they come on with your running lights, only at night, or on demand.

Please remember, our Stainless Steel products will never rust, fade, crack, or peel. No matter which package you pick, you will love your totally custom vanity plate.

CUSTOM HITCH LASERPLATE - An oval mirrored stainless steel cover plate is customized for you and then mated to all stainless 2" receiver. This is the most premium hitch cover plate on the market

LICENSE PLATE FRAMES

Completely personalized license plate frames for motorcycles and vehicle with your text or logos. We work with each customer to get the perfect fit for your plate and vehicle.
